ABOUT ME

As a frontend developer, I don't just write code; I craft digital experiences that captivate and inspire. With a keen eye for design and a passion for pixel-perfect precision, I bring websites and applications to life with elegance and efficiency. But my skills don't stop at the surface level – I dive deep into data analysis, unraveling complex problems and turning insights into actionable solutions. A curious researcher at heart, I thrive on exploring new technologies and pushing the boundaries of what's possible. Behind the screen, you'll find a dedicated hard worker, fueled by curiosity and driven by a relentless pursuit of excellence. Let's collaborate to build something extraordinary together.

WORK EXPERIENCE

01/08/2023 – CURRENT f.c.t abuja., Nigeria

● **Corp Member** Federal Ministry of Science and Technology
- Raw materials and Research Development Council

- Collaborate with the Research Development Council to optimize the procurement of raw materials for innovative projects.
- Conduct in-depth research to identify cost-effective raw materials that align with project requirements, in partnership with the Research Development Council.
